

Home Protection Checklist For Cebu Households

Simple steps to reduce damage
before storms, floods, and other risks

Philippines-based, Cebu-focused

This checklist is designed to help homeowners and renters in Cebu **prepare their homes early**, while conditions are still calm.

Preparedness is not about predicting disasters.
It's about **reducing preventable damage** by securing what can be secured and planning ahead without panic.

Use this checklist as:

- A seasonal home review
- A response to early weather advisories
- A calm preparation tool before conditions worsen

How to Use This Checklist

- ✓ Review items early.
- ✓ Focus on what you can control.
- ✓ Complete what applies to your home.
- ✓ Safety first. Stop if conditions are no longer safe.

Preparedness over panic

Home Protection Checklist

Exterior Home Protection Checklist

Notes:

Outside the home, small actions can prevent major damage.

- ☐ Secure roof sheets, awnings, and loose panels
- ☐ Clear gutters/drainage to prevent water buildup
- ☐ Trim branches close to the house
- ☐ Secure outdoor furniture, pots, and tools
- ☐ Check gates, fences, and perimeter walls

Interior Home Protection Checklist

Notes:

Inside the home, focus on water, power, and valuables.

- ☐ Elevate appliances/electronics where possible
- ☐ Move important items away from windows
- ☐ Place documents in waterproof containers
- ☐ Unplug non-essential electronics
- ☐ Know where your main electrical switch is

Documents & Records

Notes:

These are often forgotten (and hardest to replace).

- ☐ IDs, titles, contracts
- ☐ Insurance policies and receipts
- ☐ Emergency contacts
- ☐ Digital backups (photos or cloud storage)

Before Conditions Worsen

Once warnings become severe, **movement and decisions become harder**.

This checklist is meant to be completed **early**, so families can focus on safety rather than last-minute tasks.
